

Asset Management

Partnerships for Renewables (PfR) was established in 2006 and has an accomplished track record of developing, building, and operating large scale renewable energy projects. Having sold its c.600 MW development portfolio in 2017, PfR has a wealth of experience to call upon and now focusses entirely on technical & operational asset management, and consultancy services.

Pario Renewables (PRL), part of the Pario group of companies and established in 2009, is an independent SPV management company offering tailored management services solutions to projects within the renewable energy sector. Pario's approach is simple; to deliver intelligent, innovative solutions that embrace collaboration.

Seamless Joint Service

Partnerships for Renewables and Pario Renewables have combined forces to provide clients with a joint service, managing a wide range of asset and technology types.

Our Experience

PfR and PRL manage a diverse operational asset portfolio of several hundred megawatt (MW) for a number of clients. This includes single wind turbines, wind and solar farms, and biomass generators.

Our Services

Technical Management & Consultancy Services

- 24/7 remote monitoring & management (SCADA)
- Site inspection & reporting
- Maintenance management
- Power performance data analysis

- Debt and funder management
- Financial model maintenance
- Treasury management
- Company secretarial
- Financial DD

Senior Management

Simon Vince, CEO of Pfr, has worked in every aspect of renewable energy development, construction and operational management since 2000. During his career he has been actively involved with approximately 250MW of construction, 750MW of development and 300MW of operational management, and has worked with most major turbine manufacturers. He has also acted as technical advisor on wind farm acquisitions, leading the successful due diligence process on both operating assets and pre-construction opportunities.

Prior to Partnerships for Renewables (Pfr), Simon worked for Ecotricity as Head of Projects and Operations and was a member of the Renewable UK Wind Turbine Safety Rules Steering Group.

Before his switch to renewable energy, Simon spent 15 years in several roles in the service sector of the oil and gas industry, working for BP, Shell and Amoco in well services and completion engineering and design. Whilst at Schlumberger, a specialist team led by Simon jointly won the BP Worldwide Technology Award for achieving a world-first in leading well completion design and control.

Darren Barclay, Finance Director at Pario, has been working in financial and management accounting since 2000; including a position as Group Financial Controller for a major construction PLC. Darren heads up the Pario Renewables business, providing financial and company secretarial management and consultancy services to the PFI/PPP and renewable energy industries, including a number of wind and solar energy projects.

An Associate of Chartered Institute of Management Accountants, Darren's areas of expertise are technical accounting, financial reporting and business planning. Prior to joining Pario in 2006, Darren worked for a number of high profile companies including Jarvis PLC, SDRC UK Limited, Rank Xerox and British Rail.

Adam Rickard, a Director at Pario Renewables, has worked in a range of industries since 2005 focussing on energy and project finance, including financial management, acquisitions and disposals, financing and refinancing, and termination & renegotiation of long term energy supply contracts.

Adam oversees the PRL Finance Team and provides financial management and consultancy to Project Finance consortia. Also a fellow of the Association of Chartered Certified Accountants, Adam has worked on a number of renewable (wind, solar and gas / biomass CHP) and non-renewable assets for a number of high-profile clients. Prior to joining Pario, Adam worked for Carillion PLC, RWE Npower and Aonix UK Limited.
